$|\Delta y|$

The figure displays two panels comparing ATLAS experimental data with Monte Carlo models for gap fractions in 7000 GeV pp collisions. The top panel shows the gap fraction as a function of the rapidity separation $|\Delta y|$ (ranging from 0 to 6). The bottom panel shows the ratio of the gap fraction to the ATLAS data, with shaded regions indicating the uncertainty bands for the Herwig 7.2.0 (green) and Pythia 8.301 (yellow) models. The Sherpa 2.2.0 model (red) shows a significant deviation from the ATLAS data at larger $|\Delta y|$.
