$|\Delta y|$

The figure consists of two vertically stacked panels sharing a common x-axis representing the absolute rapidity difference  $|\Delta y|$  from 0 to 6. The top panel shows the 'Gap fraction' on the y-axis (0 to 2). It features three data series: ATLAS (black squares), Herwig 7.2.0 default (green dashed line with open squares), and Sherpa 2.2.8 default (red dotted line with red diamonds). All series show a general downward trend from  $|\Delta y| \approx 0.5$  to  $|\Delta y| \approx 4.5$ , with a notable spike at  $|\Delta y| \approx 4.8$ . The bottom panel shows the 'Ratio to ATLAS' on the y-axis (0.5 to 2). It displays the same three series as the top panel, but with shaded regions (green for Herwig, yellow for Sherpa) representing uncertainty bands. A horizontal line is drawn at a ratio of 1.0. The ratio to ATLAS generally stays near 1.0 for  $|\Delta y| < 4$ , but deviates significantly at larger  $|\Delta y|$ , particularly at the spike around  $|\Delta y| \approx 4.8$ .
