

Jets

Figure 1 consists of two panels. The top panel shows the ratio of the cross-section to the CMS result as a function of thrust. The x-axis is thrust, ranging from 0 to 1. The y-axis is the ratio of the cross-section to the CMS result, ranging from 0 to 1. The top panel shows a peak in the ratio at thrust ≈ 0.1, while the bottom panel shows a peak at thrust ≈ 0.1 and a dip at thrust ≈ 0.2.
