

Jets

- CMS
- Herwig 7.2.1 default

Figure 1 consists of two panels. The top panel is a plot of the groomed thrust distribution, showing the number of events (N) versus groomed thrust (x-axis, 0 to 1). The CMS data is represented by black squares, and the Herwig 7.2.1 default prediction is shown as a green dashed line with open squares. The bottom panel shows the ratio of the Herwig 7.2.1 default distribution to the CMS distribution (y-axis, 0.5 to 2). The ratio is mostly between 0.8 and 1.2, indicating good agreement between the two distributions.
