

Jets

Figure 1 consists of two panels. The top panel shows the ratio of the differential cross-section to the CMS result as a function of the width parameter. The x-axis is labeled 'width' and ranges from 0 to 1. The y-axis is labeled 'Ratio to CMS' and ranges from 0.5 to 2.0. The top panel includes a legend for 'Herwig 7.2.1 default' (green dashed line with open squares) and 'CMS' (black solid line with open circles). The bottom panel shows the ratio of the differential cross-section to the CMS result for the Herwig 7.2.1 default model (green shaded band) and the CMS result (black solid line). The x-axis is labeled 'width' and ranges from 0 to 1. The y-axis is labeled 'Ratio to CMS' and ranges from 0.5 to 2.0. The top panel also includes a legend for 'Herwig 7.2.1 default' and 'CMS'.
